New York Yankees vs. Minnesota Twins

The Yankees host the Twins in game 1 tonight. Yankees have a comfortable 4 game lead over Minnesota for the top AL Wild Card spot. Twins are 5-2 in their last 7 during game 1 of a series, but NY Yankees are 4-1 in their last 5 during game 1 of a series, pretty much even!

The Gematria (and its codes) **are mixed today** for this game as it benefits both teams somehow. The Twins could win their #79 game of the season, reversed Numerology of #97 today, but could also lose #72, reversed Numerology #27, in a day with Numerology of #27. The could also hold #23 wins and lose #22 vs LHP. Hence the Yankees, could pick up their #44 win at home, and hold #28 losses, but could also hold #82 season wins, in a day with Numerology# of #28! Jamie Garcia still hasn't won a game for NYY, so it might be a time for him to win one here, just to justify the Management's trade for him, and the spending a lot of money! Hence, if E. Santana wins today, his record will for the season will be 16-7 or #167, i.e., #39 Prime New York, so good #s for him to win, hence if he loses, his overall career losses will be 124 or #62 (x2), reversed #26 Numerology today, so that one is "in play" also! Santana's record against NYY is 1-3, negative! So, that's important! Jamie Garcia pitched well vs. the Twins, but if he loses and go to #55 losses, it will match the Numerology of #55 today; Hence, I've said, he needs to win a game for the Management to prove he was worth the money spent! He is also #34, so he could win his #68 win (#34x2) in his career today, and hold his #54 losses vs. #54 pitcher, Santana (if defeated!). Garcia held Tampa Bay Rays to 1 run the last time out! The English Kabbalah does not favor anyone. Santata in general, is a much better pitcher, so the game will be ultimately decided by the odds:

Money Line: Garcia is @ (-155) very steady, that's good. Thus, so many players will take the underdog Santana, since they will believe he shall win because is a much better pitcher. This could be a trap for them (!!!) to have Santana with the (+) money today!

Lastly: Twins are 14-39 in the last 53 meetings in New York, so they could hold the #14 wins vs. # 39 New York, in a day with Numerology# of #28 (#14x2)!

Bets: Bet365 users, we take the **NY Yankees (+1.5) runs in the 1st (4 1/2 innings lines) @ 1.37 (-270)**, and then ALL Players we take the **NY Yankees in the ML to win @ 1.64 (-155)**. Bovada players, you have no other options than taking the **NY Yankees @ (-150)** today!

I hope they won't screw this game up, as it stands, I see the average players wagering on Santana and then eating some crow today...

GOOD LUCK!
Cheers!
